

Welcome to the Eco-Star Experience. Get ready to see Maui in a whole new light.

Now, explore the wonders of Maui in one of our incredible, 21st-Century, American Eurocopter Eco-Stars. While cutting flight noise by around 50% over the isle's delicate ecologies, the Eco-Star also pampers you in serene comfort, and opens up wide-screen views never before seen from a helicopter. Smooth, spacious, powerful, high-tech—there's simply nothing like the Eco-Star Experience. And it's exclusively from Blue Hawaiian.

Of course, we also offer you our superb fleet of industry-standard American Eurocopter A-Stars at competitive prices, outfitted with our famous enhancements and custom interior touches.

Eco-Star or A-Star—it's a classic win-win situation.

"...23% more cabin space..."
Helicopter World

"...brand new, beefy and superquiet..."
Pacific Rotors

"...the latest development in a world trend toward quieter, more eco-friendly helicopters..."
Aviation Week's Show News

"...the field of view is excellent...response precise and crisp..."
Helicopter World

"...the shape of things to come... safer, quieter, more efficient... ready to join launch customer Blue Hawaiian..."

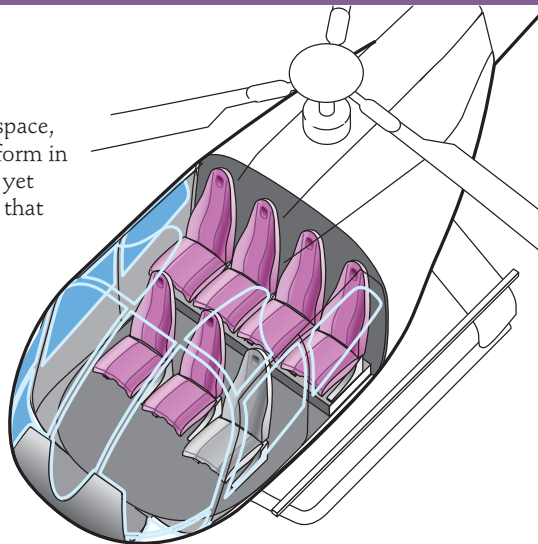

Blue Hawaiian lets you choose between the best of both worlds.

Eco-Star

Individual First-Class seats, 23% more interior space, raised "theater-style" platform in the rear, a more powerful yet more fuel-efficient engine that delivers faster flight and thus more sightseeing value. Incorporating the most advanced technologies and avionics available, the Eco-Star is truly "state of the art."

Note: illustrations are matched to scale.

A-Star

The industry-standard American Eurocopter A-Star—a great flight in a compact cabin, with bench-style seating and good visibility. Most important, our A-Stars are flown by Blue Hawaiian's pilots and maintained by Blue Hawaiian's technicians, the best in the business.
